Coursera

Skills

Soft Skills: Problem Solving, Quick Learner, Team Collaboration, Time Management

Technical Skills: HTML5, CSS3, Bootstrap, Responsive Web Design, HTTP & HTTPS (Basics), VS Code, Node.js, MongoDB (Basics)

EXPEIRENCES

4 may '26 - 30 june '26

Telecommunications Consultants India Limited

Project- TCIL website using React+bootstrap with CMS pages

Relevant coursework : React, Vite, Bootstrap, Strapi

Skills developed: problem- Bootstrap designing, web development

Adding dynamic editing of different collections

Project

AI-Quantum Privacy Architecture for National Digital Identity Systems

2026 – Present

Description: Build a post-quantum secure document verification system using AES, Kyber (ML-KEM), and Dilithium (ML-DSA) to ensure confidentiality, integrity, and authenticity of digital identity documents.

Tools/Technologies: Python (Flask), React (TypeScript), MongoDB, liboqs (Post-Quantum Cryptography), AES-256, ML-KEM (Kyber), ML-DSA (Dilithium)

Impact/Results: Implemented a quantum-resistant security pipeline enabling secure document upload, encryption, signature verification, and integrity validation with efficient $O(n)$ performance.
